About Motus

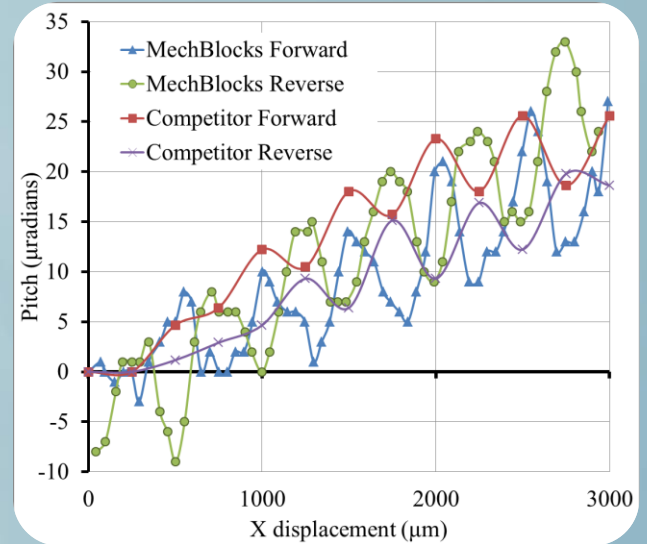

Rapid development. Precision performance.

MOTUS MECHANICAL was started by mechanical engineers looking for a solution to the expensive, and time consuming, design and development process. Their solution is MechBlocks...

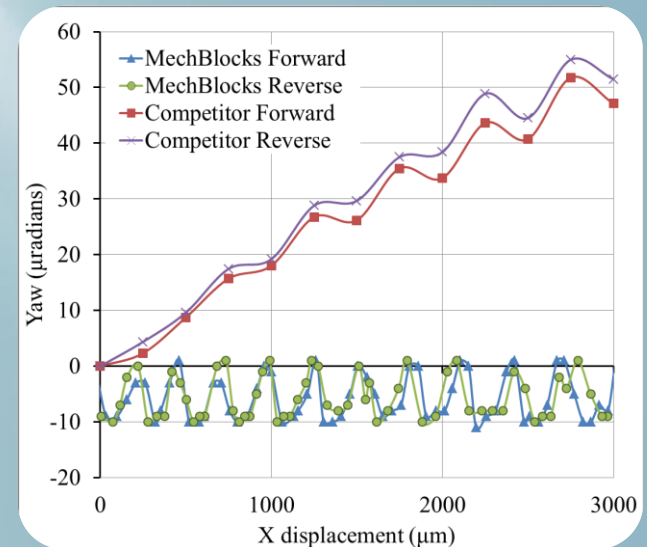

MECHBLOCKS enable you to build near limitless configurations of fixtures, frames, adjustors, translators, and complete mechanical systems. These systems can be developed and constructed in hours, saving you thousands in development costs while avoiding manufacturing delays. MechBlock systems meet or exceed the performance of comparable, application-specific products.

OUR SERVICE in addition to our products is what makes Motus a valuable industry partner. To help you achieve your solutions we provide:

- Off-site and on-site consulting services
- CAD, drawings, and datasheets
- Instructional documents and videos
- On-demand technical help
- Same day personalized quotes
- Training for design and development
